

Amal Tom Ajith

Software Engineer — Full-Stack, AI, and Security-Focused Developer

work.amaltom@gmail.com | +91 8089446670 | Bengaluru, India

amaltom.com | github.com/amaltomajith | linkedin.com/in/amaltomajith

Professional Summary

Computer Science engineering student crafting production-ready full-stack and AI-enabled systems with focus on scalability and secure infrastructure. Delivered event platforms that handled 2,500+ registrations with live analytics and zero downtime, and engineered applied AI products using LLM and speech pipelines.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C++, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express, FastAPI, Flask, REST API design

AI/Data: LLM integration, Prompt engineering, Speech-to-Text, ML workflows, Data visualization

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Cloud/Security/Tools: Google Cloud, Google Workspace Admin, SPF/DKIM/DMARC, Git, GitHub, Linux, CI/CD, Unit Testing, Scrum

Experience

Technical Lead – Web Developer

Magnovite 2025, Christ University

Sep 2025 – Nov 2025

Bengaluru, India

- Spearheaded architecture and delivery of the official full-stack event portal in a 3-month cycle (Sep–Nov 2025).
- Orchestrated real-time participant monitoring and centralized analytics dashboards used by organizing and operations teams.
- Scaled system reliability to support 2,500+ registrations, with automated slot closures and zero downtime during peak traffic.
- Coordinated cross-functional execution to ship requirement-driven features under strict event deadlines.

Full Stack Developer & Systems Administrator

Hypertraction

Jul 2025 – Aug 2025

Remote

- Engineered the corporate website and secure outbound marketing platform during a 2-month delivery window.
- Automated end-to-end domain architecture workflows, including role-based subdomain strategy and governance.
- Implemented Google Workspace controls plus SPF, DKIM, and DMARC to improve deliverability and reduce spoofing risk across business email flows.
- Delivered production-ready infrastructure with security-first configuration and maintainable deployment workflows for ongoing operations.

AI Solution Developer Intern

FlyingSpark

May 2025 – Jun 2025

Cochin, India

- Created **VoiceSQL** in a 6-week internship, converting spoken natural-language requests into executable SQL.
- Optimized Speech-to-Text and LLM orchestration to reduce query turnaround time and improve first-attempt query success for non-technical users.
- Streamlined prompt flows and query-generation logic to improve SQL precision and usability in day-to-day database tasks.
- Collaborated with product and engineering stakeholders to align model behavior with real user workflows and database constraints.

Selected Projects

StoryWeaver – AI-assisted branching storytelling platform (React, TypeScript); recognized in Top 5 at HCL GUVI Hackathon.

Live: story-weaver-sooty.vercel.app | Code: [GitHub](#)

Sentinel – Autonomous cybersecurity honeypot for phishing detection and dual-LLM interaction workflows with live deployment.

Live: sentil-ai.vercel.app | Code: [GitHub](#)

VoiceSQL – Voice-to-SQL interface using Speech-to-Text and LLM query generation.

Live: voice-sql-web.vercel.app | Code: [GitHub](#)

Magnovite Web Portal – Large-scale event registration, tracking, and analytics platform supporting 2,500+ participants.

Live: magnovite2025.netlify.app | Code: Private

Hypertraction Platform – Secure outbound marketing platform with cloud/workspace integrations.

Live: hypertraction.co | Code: Private

TerraLearn – NASA Space Apps project for crop recommendation and yield feasibility from live soil APIs.

Live: terra-learn-tozc.vercel.app | Code: [GitHub](#)

Axiom – ML-driven market analytics for stock trend prediction and portfolio insights.

Live: axiom-ten-henna.vercel.app | Code: [GitHub](#)

Everhome Chatbot – Real-time AI chatbot connecting donors and clients with an orphanage.

Live: ever-home-ui.vercel.app | Code: Private

Prepped – AI interview simulator with resume parsing, role-specific questions, and structured feedback workflows.

Live: prepped-iota.vercel.app | Code: [GitHub](#)

Publication

AI-ML for Trending Biosensing Application

Accepted and published in *International Journal of Research Publication and Reviews (IJRPR)*, Volume 4, Issue 10, October 2023.

ISSN: 2582-7421

Education & Achievements

B.Tech in Information Technology

Christ University

2023 – 2027

Bengaluru, India

- Academic focus: software engineering, cybersecurity, data systems, and service-oriented architecture.

Top 5 Finalist – HCL GUVI Hackathon for an AI-powered interactive storytelling engine.

Certifications
